

July 19, 2024

Dear Valued Customer,

Our resin suppliers have confirmed that they will be implementing the previously announced price increase effective July 1st. Inventory levels in the resin markets have tightened. This is due to an increased demand in both the domestic and exports market as well as lost production from Hurricane Beryl.

In response to the July increase, Malpack will implement an increase of 5% effective with all new orders placed on or after August 1, 2024.

All orders must call for immediate delivery. Malpack reserves the right to accept or decline any order for any reason.

Your Malpack Sales Representative will be in contact with you to answer any questions and advise you of the changing market conditions. Thank you for your continued support and loyalty.

Regards,

Bob Arpas
Canadian Sales Manager
Malpack Ltd.
