

Blainville, August 16th, 2021

Dear Partner,

It was brought to our attention that a fraudulent email seemingly sent by Ralik is in circulation. This email refers to a payment made. This type of email is what is currently known as a phishing email. Rest assured we have taken all necessary actions to rectify the situation and regret any inconvenience this may have caused you.

If you are victim of this email, we urge you not to open it and strongly recommend that you advise your I.T. team. Please do not block the email comptabilite@ralik.ca since this is an actual Ralik email address.

We invite you to contact us for any question you may have concerning this situation. We appreciate your cooperation and wish you a wonderful day,

Ralik Web Team

What is phishing?

Phishing is a type of social engineering attack used to steal user data, including login credentials and credit card numbers.

Phishing occurs when an attacker, masquerading as a trusted entity, dupes a victim into opening an email, instant message, or text message.

The recipient is then tricked into clicking a malicious link, which can lead to the installation of malware, the freezing of the system as part of a ransomware attack or the revealing of sensitive information.
