## ECOLOGO®

[www.ul.com/el](http://www.ul.com/el)

UL Environment's ECOLOGO® Program helps build and strengthen trust in sustainable products. Certification to one of UL's rigorous, multi-attribute, lifecycle-based standards indicates that a product has undergone third-party auditing and verification to stringent, science-based performance criteria, making it a more sustainable choice.

Shown as: in product charts

- UL certifies commercial and household toilet and facial tissue, napkins, and hand and kitchen towel products under its UL 175 Sanitary Paper Standards for an overall reduced environmental impact.
- These standards address recycled content and chlorine-free bleaching processes.
- Standard criteria also includes "downstream" effects such as effluent content, air emissions, solid waste reduction, and energy consumption.
- The holistic approach incorporated in this certification matches our philosophy of environmental stewardship.

## Forest Stewardship Council® (FSC®)

<https://us.fsc.org/en-us/certification>

FSC ([www.fsc.org](http://www.fsc.org)) certification ensures that products come from responsibly managed forests and other controlled sources that provide environmental, social and economic benefits. FSC Chain-of-Custody certification traces the path of products from forests through the supply chain.

Over the past 20 years, FSC® has earned a reputation as the most rigorous, credible forest certification system. FSC is the only forest certification system governed by an open membership (General Assembly) where interests are equally balanced by economic, social and environmental chambers.

Identified as Mixed or Recycled

- Certifiers assess forest management using the FSC standards. Certifiers are independent of FSC and the companies they are auditing. This third-party verification is crucial to the integrity of the FSC system.
- Forest Management certification provides assurance that forests are being managed to the highest environmental and social standards.
- Chain-of-Custody certification provides assurance that products bearing the FSC label directly support responsible forest management.
- **FSC Mix (FSC M) and FSC Recycled (FSC R)** certifications are available for all Essity mills in North America.

## Green Seal

[www.GreenSeal.org](http://www.GreenSeal.org)

- The standard addresses the life cycle issues for sanitary paper products. The life-cycle approach is used to ensure that all significant environmental impacts are considered in the development of a standard, from raw materials extraction through manufacturing to use and disposal.

[www.biopreferred.gov](http://www.biopreferred.gov)

Shown as: in product charts

# Tork Microfibers

Microfibers are very fine so that they have a lot of surface area, which increases the absorbency. Microfiber cloths have pockets, which easily pick up dirt and dust and are also fine enough to pick up microbes. When woven together into a textile cloth, microfibers create a cloth with excellent and efficient cleaning properties.

800200

- Wipes away 99.99% of microorganisms from surfaces-including Cdiff\*
- Designed for one-time use and disposal
- Can be used dry or with cleaning solutions, sanitizers, and disinfectants
- Low lint
